**MAKE IT WONDERFUL**

Designed with quality and value in mind

Designed with quality and value in mind.

PRO-VALUE RANGE

## KITCHEN SYSTEMS

**MAKE IT WONDERFUL**

From ultra-modern to traditional shaker style, we think that completing your perfect kitchen should be as easy as possible, so this brochure is designed to offer you all the information and inspiration you need to make a selection that complements the way you use your kitchen.

Your handy checklist to choosing your perfect Franke products:

### Choosing a sink

- Measure the cabinet width of your kitchen
  - Choose the material of sink
  - Choose bowl configuration of sink.
- If choosing an inset sink, check on the sink profile options.  
If choosing an undermount sink, decide how you want the work surface cutting to suit

### Adding accessories and extras

- Choose from a range of complementary accessories
- Check which plumbing kit you need to buy to connect the sink to your waste system

### Choosing a tap

- Choose from the full range of taps, including instant boiling water and filtered taps
- Check with your retailer/installer that your water pressure requirements will work with your chosen tap

### Choosing a hood

- Choose from the full range of hoods, which covers a wide variety of installation options.
- Ensure your chosen hood has a power rating that is suited to the size of your kitchen (see page 69).

**Solutions for your ideal kitchen**

- Explore our range of waste disposers
- Discover how a waste sorter could make your life easier

### Simple pricing

All the prices in this brochure are inclusive of VAT, so the price you see is exactly the price you'll pay.

Sinks

CABINET WIDTH

↔

450

↔

600

↔

900

The cabinet width measurement denotes the measurement which the sink bowl(s) need to fit into.

SINK STYLE OPTIONS

Inset:

The frame of an inset sink sits on top of the worksurface. These sinks are compatible with any worksurface, including laminate worktops.

Undermount:

An undermount sink is installed underneath the worktop, only compatible with solid surface worktops such as granite or solid wood.

Belfast:

Belfast sinks are installed either 'dropped-on' to a purpose built cabinet or by using installation brackets.

INSET SINK PROFILES

Standard:

Edge is rolled over to meet the worktop.

Swiss-edge:

Edge has a built-in water-protection seal.

Slim-Top:

Edge sits flat on the surface of the worktop.

BOWL CONFIGURATION

Ensure you choose the correct sink configuration for your kitchen.

LHD, RHD and REV:

Indicates whether an inset sink is available with a Left Hand Drainer (LHD) or Right Hand Drainer (RHD). REV Indicates an inset sink suitable for both left and right configurations.

LHSB and RHSB:

Denotes whether an undermount sink is available as Left Hand Small Bowl (LHSB) and/or Right Hand Small Bowl (RHSB).

SINK EXTRAS

Waste Disposal Unit Compatibility:

See page 11 for more details.

Sink features a patented Hygienic Overflow:

See page 12 for more details.

Plumbing Set Connector included:

Some FrAGRanite 1.5 bowl sinks contain a plumbing set connector linking the 2 bowls.

PLUMBING KIT COMPATIBILITY

Siphon 1:

Compatible with a single bowl sink.

Siphon 2:

Compatible with 1½ bowl and 2 bowl sinks.

Siphon 3:

Compatible with 3 bowl sinks.

Taps

WATER PRESSURE

Suitable for Low Pressure Systems:

Indicates this tap will work with a low pressure system, delivering at least 4 litres per minute of hot water at 0.3 bar pressure.

FEATURES

Perlator:

Mixes air into the flow of water to give a champagne like flow.

Filtered Water:

Dispenses filtered water.

Pull-Out Spray:

Feature a pull-out spray, useful for directional rinsing.

Directional Nozzle:

The end of the tap can be manipulated in any direction.

Pull-Out Nozzle:

Feature a pull-out nozzle, useful for directional rinsing.

Guarantees

50

Sinks:

50 Years.

+

Waste Disposal Unit:

Lifetime Warranty.

10

Waste Disposal Unit:

10 Years Warranty.

8

Waste Disposal Unit:

8 Years Warranty.

5

Taps:

5 Years valve mechanisms and 1 year coatings and finishes.

MAKE IT WONDERFUL WITH THE FRANKE PRO VALUE RANGE

It's easy to be ordinary; to have an ordinary home, filled with things you neither love nor hate. But you should never settle for ordinary and that's why we want to make everything we make wonderful. Wonderful turns a house into a home and turns work into play. Every Franke product aims to be wonderful in every way; from the first glimpse of carefully considered design, to manufacturing standards that ensures you can feel the quality and craftsmanship of every piece.

This brochure captures the spirit of wonderful in order to captivate and inspire you. A comprehensive range of sinks, taps and accessories can help turn an everyday kitchen extraordinary and turn a daily chore into a guilty pleasure.

Let everyone else be ordinary. Let's make it wonderful.

**Be inspired**  
We are constantly thinking of new ways to make our range even better, adding new products, new ideas and new innovations. Keep up to date with it all on our Facebook and Twitter pages.

## OVER ONE HUNDRED YEARS OF PASSION

Making something wonderful rarely happens overnight, and Franke has been pushing the boundaries for over 100 years. Founded in 1911, Franke was built on a foundation of precision engineering, combined with traditional craftsmanship. Over 100 years later, those principles endure, while a focus on the changing needs and lifestyles of our customers has helped us become the world's largest manufacturer of kitchen sinks.

### Swiss precision engineering

The Franke story began as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke in 1911. Since then, we've established efficient and economic manufacturing facilities all around the world.

Many things have changed in the past century, but what is always the same is a set of values, characterised by respect, trust and openness. The values of innovation, entrepreneurship, quality and stylish design were in the heart of Hermann Franke and continue to be at the heart of the business, as we enter a second century of smart and stunning design.

### Peace of mind with Franke quality

Our exacting standards that we apply to the design and production of our products gives us absolute confidence in every product we make. And you should have the confidence that anything you buy from us is built to last. That's why we're proud to offer a 50-year guarantee against manufacturing defects on our sinks and extensive guarantees for other products.

### Franke More in Store

We believe that the best place to buy our products is in store. That's because you get a friendly face to listen to and offer expert advice. You also get an unrivalled opportunity to see and feel the quality of Franke for yourself.

That's why we created More in Store, an initiative to support our retailers in giving you great service and the best possible buying experience. What it means for you is more choice, better quality, more knowledge and unbeatable after sales support. Look out for stores displaying this logo and you will be assured of genuine, quality products and the high level of service you would expect. Find your nearest Franke retailer by using the Dealer Locator at [www.franke.co.uk](http://www.franke.co.uk)

# MATERIAL AND FINISH OPTIONS

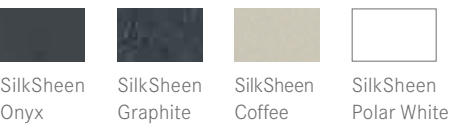

Everyone has a different vision of what would make their kitchen wonderful, and that often begins with how they intend to use it. The demands on your sink will dictate which material is right for your kitchen, as each precision-engineered material has individual character and unique benefits. Our range covers everything from the latest trends to traditional favourites, so all you have to do is pick the one that best fits with your cooking style, your lifestyle and your personal style.

## Fragranite treated with Sanitized®

Fragranite is an exceptionally tough material which is highly resistant to burns, dents, chips and stains. It was pioneered by Franke and contains 80% granite to form a unique material with a subtle sheen that is warm to the touch.

Kitchens can be a critical location for spreading bacteria and demand special attention to hygiene. On unprotected material, bacteria can multiply every 20 minutes making surfaces unhygienic. The integrated Sanitized® hygiene function in Fragranite sinks helps to keep this area clean and provides the sink with lasting protection. It does not replace normal cleaning but helps to keep surfaces free from bacteria. Tests have proven that Fragranite treated with Sanitized® reduces bacteria and microbe growth by 99%.

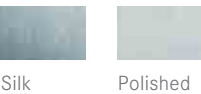

Active biocidal substance: silver ions. The silver ion locates the bacteria via the moisture and deactivates it.

## Stainless Steel

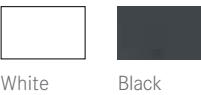

Franke stainless steel sinks are made from premium quality chrome nickel steel, which looks stunningly beautiful, is highly resistant to staining, rust and corrosion - plus it won't chip, craze, flake or break. It's the most popular material - and for good reason: Stainless steel has a timeless quality that sits beautifully in a traditional or contemporary style kitchen, offering stunning good looks and a durability that helps keep it looking at its best for years.

Franke offers sinks in a selection of stainless steel finishes, so whether you prefer the more reflective qualities of the polished finish or the more subtle look of the silk or brushed finishes, which give a more matt sheen, there is a stainless steel solution for you.

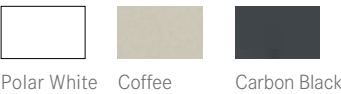

## Ceramic

Ceramic sinks have been a popular choice for years and combine well with a variety of work surfaces such as wood, glass and granite. Ceramic sinks have a smooth, impervious surface, which is resistant to all standard household chemicals. It's a very hardwearing choice that stands up to heat, staining and impacts with ease.

## Tectonite

Exceptional resistance to heat, shock and impact, coupled with unique design freedom makes Tectonite sinks the ultimate choice for hardworking, stylish kitchens. New technology represents a giant leap forward for synthetic materials, whilst allowing for exciting minimalist designs in the most popular colour options.

# CHOOSING YOUR PERFECT SINK

As the kitchen sink is seen as the heart of the kitchen, it’s the perfect starting point for creating your dream kitchen. Let your imagination run free with a range of fabulous options to help you maximise space and accentuate the look of the entire room. There are however certain functional considerations to take into account and the following information will help to ensure that your ideal sink is the perfect fit for your ideal kitchen.

## Measuring your cabinet width

It is essential to correctly measure the cabinet width where your sink will be installed. The bowl, or bowls in the case of a multi-bowl sink, will need to fit into this space. Each sink in this brochure will show a cabinet size, and your cabinet width needs to be equal to or greater than the stated measurement.

## Installation formats

Sinks can be installed in 3 ways depending on your kitchen worktop and your preference:

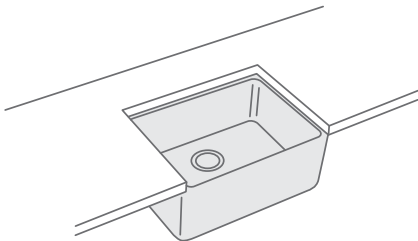

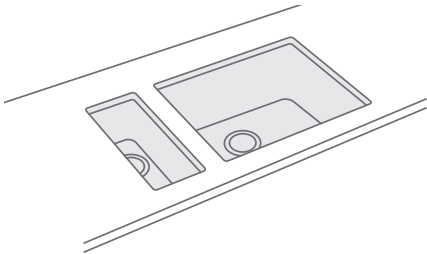

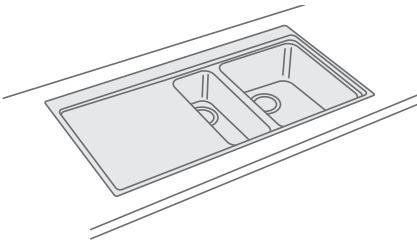

**Inset sinks**  
Inset sinks are installed from above into a pre-prepared hole in your worktop. It gives you the widest range of sink shapes, sizes and styles to choose from.

**Undermount sinks**  
Undermount sinks are installed underneath the worksurface and therefore require a solid surface worktop such as granite or wood, they are not compatible with laminate worksurfaces.

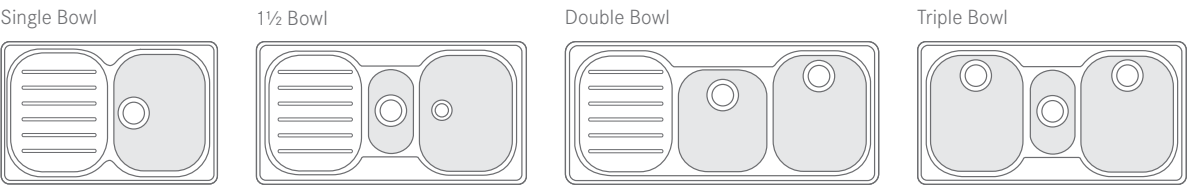

**Belfast sinks**  
Belfast sinks can be used as either a freestanding feature with brackets or sit on top of base units.

## Bowl and drainer configuration

The type and position of your bowl depends on how you intend to use your sink. If you like room to clean large items like grill pans, a larger single bowl may be best for you, or for a multi-functional purpose, you may prefer the versatility of 2 separate working bowls. For multi-bowl undermount sinks, it is important to decide which side the smaller bowl you require.

The drainer location is also an important consideration. For many sinks you will need to choose the specific version you prefer - with drainer on the left or right hand side. Whereas other sinks are reversible which indicates the drainer can be positioned on either side. Please check which format suits your kitchen best before ordering.

## Plumbing kits

Franke plumbing kits are designed to assist in optimising the underside of the cabinet space and in many cases provide for better utilisation of under-sink storage.

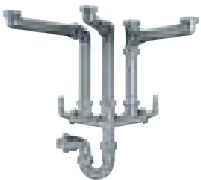

Franke Siphon plumbing kits are made of rigid grey polypropylene and are the hygienic solution to a Franke sink waste system. Siphon plumbing kits have a manifold with an incline and an air vent for faster water disposal. The relevant plumbing kit is shown with each sink throughout the brochure.

**Siphon 1**  
(for single bowl sinks)

**Siphon 2**  
(for 2 bowl sinks)  
112.0052.536

**Siphon 3**  
(for 3 bowl sinks)  
112.0083.810

# TAPS WORTH TALKING ABOUT

Explore endless shape, line and contour possibilities to make an ordinary kitchen something special. The Franke tap range provides your kitchen with a focal point – and in some cases, a talking point. Featuring cutting edge design and a whole host of innovative features to enhance your lifestyle.

**Mixer taps**  
Our wonderful range spans the entire spectrum of design, from traditional bridge taps to the chic practicality of a chef's style tap. Many have features to simplify meal preparation and kitchen tasks so that the everyday can become wonderful.

**Filtered water taps**  
Our FilterFlow taps deliver hot, cold and filtered water in high style. No need to buy bottled water and you can even do your bit for the environment.

## Tap flow rates explained

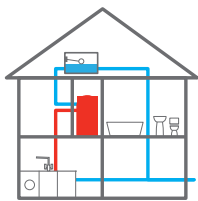

Before choosing your Franke tap it is essential to check whether you have a high or low pressure water system.

If your property has a low pressure water system you will need to check the flow rating of the taps before you make a purchase. If you install a tap with a low flow rating into a low pressure water system you may be disappointed with the flow of water from your tap. In these instances it will be difficult to achieve a suitable mixed flow of water through the tap as the cold mains water is delivered at a higher pressure and will overpower the weaker hot water pressure.

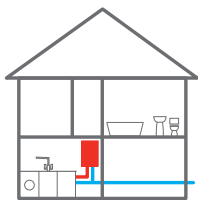

If you have a high pressure system in your home, such as a combi-boiler or pumped system, you should be able to choose from the full range of taps in our range. We strongly recommend that your plumber or installer checks the water pressure in your home before making a purchase.

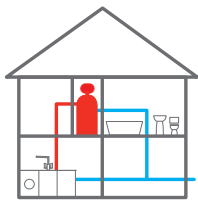

This symbol indicates the tap will work with a low pressure system, delivering at least 4 litres per minute of hot water at 0.3 bar pressure.

**Low pressure (Gravity-fed system)**  
You have a cold water tank in your attic and a hot water tank in your airing cupboard. You should choose taps which state they are suitable for a low pressure system.

**High pressure (Combi-boiler system)**  
You have a boiler unit but no hot water cylinder, the boiler unit is usually found in the kitchen and delivers hot water on demand. You should be able to choose from most of our taps.

**High pressure (Pumped system)**  
You have a hot water cylinder with an expansion vessel on top (often called Megaflor), usually found in the airing cupboard, but you do not have a cold water tank. You should be able to choose any of our taps.

## Sink Accessories

It's the little things that make life extra special, so we've developed a range of extras to do just that. People use their sink in different ways, so these products correspond to common kitchen activities, complement the design of your Franke sink and turn it into the ultimate multi-purpose workstation.

**Franke Rollamat**  
The Franke Rollamat is a handy accessory, which can be used to drain glasses or crockery, but also doubles as a trivet to protect the work surface from hot cookware straight from the oven, hob or grill. When not in use, this innovative accessory can be rolled up and conveniently stored away.

ROLLAMAT	COMPATIBLE SINKS	SIZE	FUN No.	PRICE
Rollamat 36	MRG, MRX	361x330mm	112.0075.642	£65.50
Rollamat 40		400x400mm	112.0050.988	£65.50

To see the full range of accessories available for each sink visit [franke.co.uk](http://franke.co.uk)

## Waste Disposal Units

Clever design frees the kitchen of unsightly and unhygienic organic household waste, leaving you to enjoy a clean and tidy kitchen. With an ease of use that's hard to beat it can even take the most mundane of daily chores and turn it into a little guilty pleasure.

Thanks to a permanent magnet motor, Franke Turbo Plus Waste Disposal Units reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.

# DETAILS THAT MAKE THE DIFFERENCE

At first glance, some features seem to be little more than decoration; others, you may not even notice at all. Sometimes however, small details can make a huge difference. Whether it's to save you time, make cleaning easier, boost performance or simply provide an efficient solution for life's little challenges, every aspect of a Franke sink is carefully designed to make life easier.

### Advanced waste systems

Franke sinks are equipped with stainless steel basket strainer wastes which can be used to prevent foodstuffs from entering the waste system. But the attention to detail does not stop there; underneath the sink Franke waste kits may include such features as Sanitized® anti-bacterial properties and fast flowing air vent systems, whilst always ensuring they are as low-profile as possible, allowing you to benefit from extra cupboard space.

### Deeper bowls

Many Franke stainless steel sink bowls are formed using a manufacturing technique known as deep-drawing and annealing. The bowls are formed using a 2-stage process which starts with deep drawing a flat sheet of steel. The annealing process allows the end result of the bowls to be deeper, without compromising the integrity of the steel.

### Hygienic Overflow

Many Franke sinks come with a Hygienic Overflow, which offers versatility for cleaning. Simple removal of the logo plate reveals the overflow aperture for easy, hygienic cleaning.

### Heat & sound insulation

All Franke stainless steel bowls are sound insulated to reduce the sound of water in the bowl. This is achieved by rubber insulation pads under the sink, or by a sprayed dynaphon layer, applied during manufacture. The grey dynaphon spray also insulates, minimising heat escaping from the bowl, keeping water warmer for longer.

# COMPLETE YOUR KITCHEN DREAM WITH EASE

## 1 Find a sink to suit your style

To help you navigate the wide range of design, installation and functionality considerations surrounding your choice of sink, you'll have detailed information at your fingertips. Each option is explained fully over the following pages, but the handy pull-out flap gives you an at-a-glance reference guide.

## 2 Add your perfect tap

Franke taps combine outstanding performance and stunning design to suit your taste – whatever it may be. Our taps are designed to fit a standard 35mm tap hole (except where indicated). It is also important to identify whether your home has a high or low pressure water system, as it will affect your choice of tap – your installer or kitchen retailer should be able to help with this.

## 3 Choose accessories & extras

We also have a number of stylish and innovative products that are specifically designed to enhance the aesthetic and functionality of your sink, streamlining kitchen tasks to preserve its look and longevity.

## 4 Consider a Co-ordinated Propack

To make your choice easier, we've devised affordable Propacks that provide a perfect partnership of sink and tap. Some are also available with complementary accessory packs (Accpacks) that transform your sink into a versatile work area. If the selections in the pack are not to your taste, don't forget you have the entire range of taps and a number of clever accessories to choose from for many sinks.

## 5 Select a Waste Disposal Unit

Add a Franke Waste Disposal Unit to your kitchen for an even more functional work area.

UNDERMOUNTED SINKS

For a flawless, uninterrupted look to your kitchen, an undermount design is a perfect solution. Suitable for solid worksurfaces such as granite and wood, a Stainless steel undermount sink clips directly underneath the surface to provide a work area that is elegant and hygienic. Steel undermounts are particularly easy to clean and exceptionally durable, making it an ideal choice for those unwilling to compromise on style or performance.

## FRANKE FILTERFLOW ZURICH

Available as an affordable upgrade, the FilterFlow Zurich offers you pure, filtered water straight from the tap. The sleek, clean good looks will complement the overall aesthetic of almost any kitchen, while cold filtered water on demand provides the ultimate in convenience and a boost to your wellbeing.

The FilterFlow Zurich also delivers hot, cold and mixed temperature water at the point of use and to access the filtered cold water instantly, simply push the cold water lever backwards. By choosing this tap, you'll even be doing your bit for the environment, as you'll no longer have need for expensive and wasteful bottled water.

## WASTE DISPOSAL UNITS

A choice of four waste disposal units designed to free the kitchen of unsightly and unhygienic organic household waste. Each unit is the essential add-on for ensuring that all Franke appliances and work surfaces remain looking immaculate.

Thanks to a permanent magnet motor, Franke Turbo Waste Disposal Units reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.

### Waste Disposal Unit Turbo Plus TP-50

FEATURES	
Feed:	Continuous*
Motor Horsepower:	½ HP
Motor Speed RPM:	2600
Motor Type:	High Torque Dual Magnetic
Air Switch:	Integral
Mounting System:	Professional 3-bolt
Warranty:	8 Years
PRICE	
£241.00	

### Waste Disposal Unit WDU Turbo Plus TP-75

FEATURES	
Feed:	Continuous*
Motor Horsepower:	¾ HP
Motor Speed RPM:	2700
Motor Type:	High Torque Dual Magnetic
Air Switch:	Integral
Mounting System:	Professional 3-bolt
Warranty:	10 Years
PRICE	
£303.50	

### Waste Disposal Unit Turbo Plus TP-125

FEATURES	
Feed:	Continuous*
Motor Horsepower:	1.25 HP
Motor Speed RPM:	2800
Motor Type:	High Torque Dual Magnetic
Air Switch:	Integral
Mounting System:	Professional 3-bolt
Warranty:	Lifetime
PRICE	
£376.00	

### Waste Disposal Unit Turbo Plus TP-125B

FEATURES	
Feed:	Batch**
Motor Horsepower:	1.25 HP
Motor Speed RPM:	2800
Motor Type:	High Torque Dual Magnetic
Air Switch:	N/A
Mounting System:	EZ Mount
Warranty:	10 Years
PRICE	
£338.00	

**Extended flange**  
An extended flange is available from service agents at extra cost if required when fitting to ceramic sinks.

PRICE	
133.0287.905	£32.50

**Tap brace**  
The tap brace is installed under the sink and connects the tap to the worktop for extra support. It has a variable collar to ensure it will fit any model of tap and can be used on any inset stainless steel sink.

PRICE	
133.0026.896	£13.00

\*Continuous Feed models are operated by an Air Switch (or alternative) and waste food is fed through the open neck of the unit.  
\*\*Batch Feed model is activated by loading the chamber and rotating the WDU plug. Batch Feed model not compatible with ceramic sinks.  
In both cases, a continuous supply of water is necessary whilst the WDU is in use. Member of REPIC for WEEE Regulations. EEE producer  
Registration number - WEE/DG0059TT. When fitting a WDU to a single bowl model sink, it may be necessary to purchase an adaptor from the sink overflow, available from our service agents.

Experience the full range of Franke products.

To understand the full range of products from Franke you may also want to be inspired by the Franke Specialist range brochure. All Franke brochures are downloadable from [www.franke.co.uk](http://www.franke.co.uk), or alternatively call the consumer brochure line on 0161 436 0209 to get your copy through the post now.

Specialist Range Brochure

994.0363.493

This is the signature Franke range – featuring the most desirable Franke sinks, taps and decorative hoods available. All the products in this range have been designed, styled and built to the finest quality.

Colours shown are for reference only. All sinks available with left or right hand drainer. The description 'reversible' means that the design enables the same sink to be turned to drainer on the left or drainer on the right. In the case of a 'handed' sink it is necessary to specify which side the drainer is required e.g. Epos EOX 651 left hand drainer or EOX 651 right hand drainer. All bowls sizes and dimensions are described in mm.

Franke sinks have a 50 year guarantee against manufacturing defect. Franke taps are guaranteed against defective materials and workmanship for 1 year in relation to coatings and finishes, and 5 years in relation to valve mechanisms. Franke will replace (and where appropriate repair) defective sinks. In relation to taps, Franke will, where appropriate, provide replacement parts for your taps or replace your taps at their discretion. Any associated or ancillary costs to be incurred by you as a result of replacement of Franke sinks and taps under this guarantee shall in all cases be previously approved by Franke UK Limited. This guarantee is in addition to and does not affect your statutory rights. Prices shown are UK mainland prices effective from 1st April 2015 and include VAT at the current rate of 20%. The Franke policy is one of continual improvement and Franke reserves the right to alter models and specifications without notice. E&OE.

Member of REPIC for WEEE Regulations. EEE Producer Registration Number - WEE/DG0059TT.
